EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John P. Murtaugh on 10/22/07.

The application has been amended as follows:

Claims 33-39 have been cancelled.

The following is an examiner's statement of reasons for allowance:

The closest prior art, Ciribolla, teaches a reaction of methionine hydroxyl analogue (MHA) with the carbonate of a bivalent metal in the presence of water (abstract; and page 6). Ciribolla, however, does not teach a reaction in which there is a direct reaction between an oxide of the bivalent metal and the MHA without the presence of the carbonate. The Declaration filed 10/17/07 shows unexpected results from the direct reaction between the metal oxide and MHA includes higher reaction rate, does not facilitate disagreeable species, does not cause spattering, and no formation of foam thus, facilitates higher yield.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 26, 27 and 30-32 are allowed.
